

Temitope Emmanuel Orojo

Ondo State, Nigeria

Tel: +2349035265815

Email: temitopeorojojr@gmail.com

PROFESSIONAL SUMMARY

Results-driven professional with a unique blend of expertise in network security engineering and web development. Adept at implementing robust security measures and proficient in programming languages/script for web development. Experienced in administering Windows Server, Active Directory, and Group Policy. Skilled in seamlessly transitioning between network security and web development projects. Strong problem-solving abilities and a meticulous approach to troubleshooting. Committed to delivering secure and high-quality solutions to optimize organizational effectiveness

PROFESSIONAL EXPERIENCE

IT Support Specialist/Administrator

May 2022 – June 2023

NATIONAL YOUTH SERVICE CORPS – FEDERAL POLYTECHNIC ADO - EKITI

- Responding to student inquiries and complaints related to registration, payment issues, ID card registration, and course form registration. Providing guidance and assistance to resolve these issues effectively and efficiently.
- Ensuring the timely and accurate uploading of student results to the online portal. Collaborating with faculty members and relevant departments to collect and process the necessary data.
- Assisting in the maintenance and management of the school's database. This includes organizing and updating student records, managing course information, and ensuring data accuracy and security.
- Supporting students with issues related to the registration of course forms. Helping them navigate the registration system, troubleshoot errors, and resolve any difficulties they encounter.
- Collaborating with the web development team to manage and update the school's official website and result portal. Ensuring the accuracy of information, fixing any technical issues, and implementing necessary updates.
- Offering technical support and troubleshooting assistance to students, faculty, and staff members. Resolving hardware, software, and network-related issues, and escalating more complex problems to the appropriate IT personnel.
- Supporting the IT department and administrative staff with various tasks as needed. These includes data entry, documentation, equipment inventory management, and other administrative duties.

Network Security Engineer (Remote Worker)

December 2019 – 2023

COMET NETWORKS - ATLANTA USA

- Handled customer calls for networking problems to minimize downtime and maximize network availability.
- Deployed and configured Palo Alto firewalls, including the implementation of Global Protect, IPsec, and VPN solutions for secure remote access.
- Integrated Active Directory/LDAP with Palo Alto firewalls, establishing seamless user authentication and access control.
- Configured and managed various NAT translation methods on Palo Alto firewalls, such as Static, Source (Hide), and Destination NAT.
- Configure and implement SSL decryption on Palo Alto firewalls to inspect encrypted network traffic and identify potential security threats.
- Monitor decrypted traffic for anomalies, security breaches, and suspicious activities using Palo Alto firewall's monitoring and logging tools
- Developed and maintained comprehensive security rules and profiles, ensuring robust network security and mitigating potential threats.
- Implemented and fine-tuned Global Protect gateway and portals, providing secure remote access to authorized users.
- Leveraged App ID feature to accurately identify and control application traffic, enhancing network visibility and control.
- Configured User-ID for precise mapping of network activity to individual users, facilitating effective access management.
- Conducted proactive monitoring of firewall logs, promptly detecting and responding to security incidents.
- Successfully deployed and integrated Palo Alto firewalls onto the Panorama management platform, enabling centralized management and streamlined configuration.
- Monitored logs and performed troubleshooting tasks for multiple firewalls using Panorama, ensuring optimal performance and swift issue resolution.
- Created and managed user groups and templates on Panorama, ensuring consistent configuration across Palo Alto firewalls for enhanced efficiency.
- Implemented high-availability configurations, including passive and active modes, guaranteeing uninterrupted network availability and resilience.

Website Developer

GOD'S POWER CYBER CONSULT - ONDO STATE, NIGERIA

2016-2019

- Successfully managed multiple website projects from conception to completion, ensuring timely delivery and adherence to client requirements.
- Utilized HTML, CSS, and JavaScript to design and implement visually appealing and interactive website layouts.
- Implemented back-end functionality using PHP and Django Python framework, facilitating dynamic content generation, form submissions, and database integration.

- Managed school databases using SQL, ensuring efficient data storage, retrieval, and manipulation to support various administrative and academic functions.
- Developed a cybersecurity tech company website, implementing robust security measures and informative content to promote the company's expertise and solutions.
- Developed websites using Content Management Systems (CMS) such as WordPress, leveraging themes, plugins, and customizations to create visually appealing and user-friendly websites.
- Designed and developed institutional websites with an emphasis on showcasing organization's mission, services, and achievements, incorporating responsive design principles for optimal viewing across devices

IT Instructor (Remote, Online Classes) - Network Security

2019 – 2020

Cyber Institute Atlanta – USA

- Delivered remote online classes focusing on network security, covering topics such as basic networking fundamentals (IP protocols, OSI models), firewall management, and Windows Server administration.
- Provided hands-on instruction through practice labs for configuring and managing firewalls, utilizing Active Directory for user and computer management, and administering Group Policy.
- Designed and facilitated simulated environments to reinforce theoretical concepts, enabling students to troubleshoot network issues, configure firewall rules, and administer Windows Servers.
- Monitored student progress, conducted assessments, and offered personalized feedback to ensure comprehension and continuous improvement.
- Stayed up-to-date with industry trends and integrated relevant security practices and frameworks into the curriculum, emphasizing secure configurations and adherence to compliance guidelines.
- Provided technical support and troubleshooting assistance for virtual classroom platforms, lab exercises, and software installation

Technical Skills

- **Firewall Management:** Proficient in managing Palo Alto and Checkpoint firewalls, ensuring network security.
- **Network Infrastructure:** Skilled in Cisco Routing and Switching, facilitating efficient data transfer and network connectivity.
- **Windows Server Administration:** Experienced in administering and maintaining Windows Servers, including Active Directory and Group Policy management.
- **Database Management:** Proficient in working with Structured Query Language (SQL), managing and querying databases.

Experienced in managing Database Management Systems (DBMS) such as MySQL and SQL Server.

- **Website Development:** Strong proficiency in web development languages such as HTML, CSS, and JavaScript.

Skilled in server-side scripting language (PHP) for dynamic web page functionality.

Experienced in working with Django as a back-end framework, enabling efficient web application development.

- **Content Management Systems (CMS):** Proficient in utilizing Content Management Systems, specifically WordPress, for website management.
- **Web Security:** Knowledgeable in web security principles, implementing measures such as SSL certificates and password hashing.
- Proficient in utilizing Microsoft Suite applications (Excel, MS Word, PowerPoint) to perform a wide range of tasks, leveraging advanced features, and navigating the software with ease.
- **Adaptability:** Quick at adapting to new environments and collaborating effectively with diverse teams
